

AI-Ready Website Playbook

How to prepare your website for the no-click AI future — step-by-step.

By 2027, AI agents will browse on behalf of humans. When a prospect wants to hire a home service company, an AI will read every relevant page across every competitor and recommend one. This playbook tells you exactly what pages to build and how to structure them so that AI always recommends YOU.

■ How AI Agents Choose Who to Recommend

1. AI gathers everything it knows about the prospect's problem.
2. AI crawls your website (and competitors') looking for answers to that problem.
3. AI ranks companies based on how completely and clearly their site answers every relevant question.
4. AI recommends the winner to the human.

Your job: Make sure your website is the most complete, most credible, and easiest for AI to parse.

MASTER PAGE CHECKLIST

Every page below needs to exist on your site. Check each box as you complete it. Priority order: top = most impactful now.

- ☐ **About Page (main)**
Brag page — why you're the best choice
- ☐ ■ **Company History sub-page**
When founded, milestones, credibility signals
- ☐ ■ **Why Work With Us sub-page**
Benefits, guarantees, differentiators
- ☐ ■ **Team Member pages**
One page per key team member
- ☐ **FAQ Page**
Answer EVERY question that comes up on sales calls
- ☐ **Pricing Page**
Even a range or starting price helps AI
- ☐ **How To Work With Us Page**
Outline your process step-by-step
- ☐ **Service Pages (one per service)**
Detailed — what it is, what's included, results

■ Sub-service pages

Linked from the main service page

Use Case / Demographic Pages

Format: '[Service] for [Customer Type]'

Case Studies / Project Examples

Specific stories: problem → solution → result

Reviews / Testimonials Page

All-star reviews + summarized themes

Competitor Comparison Pages

One per competitor: why you win for your ICP

Blog: Bottom-of-Funnel Posts

'How to choose best [service] company in [city]'

Blog: Problem-Solving Posts

'How to fix [problem your service solves]'

STEP-BY-STEP ACTION PLAN

01

Build Your About Page Hub

WHAT: A flagship 'brag page' about your company that links to all sub-pages.

HOW: Write 400-800 words covering: who you are, how long you've been operating, how many jobs completed, licenses/certifications, service area, and core values. Add links to sub-pages at the bottom.

■ **PRO TIP:** Mention specific numbers: '500+ roofs replaced', '12 years in business'. AI treats specificity as credibility.

Write the main About page copy

Link to: History, Why Us, Team pages

Add trust badges / certifications

Include a photo of your team or work

02

Create Your Power FAQ Page

WHAT: A single page that answers every question a prospect could ask — essentially training AI to sell for you.

HOW: List every question you get on sales calls. Every objection. Every 'how does it work?' Write a clear, factual answer for each. Aim for 20-50 questions minimum. Put the most common questions first, then keep going.

■ **PRO TIP:** Don't gatekeep. The more openly you answer pricing, timeline, and 'what if something goes wrong' questions, the more AI trusts you.

- ☐ List 20+ real sales call questions
- ☐ Write clear answers for each
- ☐ Organize by category (pricing, process, quality, etc.)
- ☐ Add schema markup (FAQPage type)

03

Add a Pricing Page

WHAT: Give AI (and humans) enough pricing context to pre-qualify — even without exact numbers.

HOW: If you can't show exact pricing, use ranges ('Most projects run \$X-\$Y'), explain what affects price, and list what's included. If you do show pricing, add a short explanation for each tier.

- ☐ Create /pricing page
- ☐ Include at least a starting price or range
- ☐ Explain what factors affect cost
- ☐ Add a clear CTA (call, quote form, etc.)

04

Build 'How To Work With Us' Page

WHAT: A simple process page showing the customer journey from first contact to completed job.

HOW: Use a numbered list or visual timeline: Step 1 — Call/Quote, Step 2 — Schedule, Step 3 — We do the work, Step 4 — Final walkthrough, Step 5 — You're done. Keep it simple. Link to this from your About page.

- ☐ Create /how-it-works or /our-process page
- ☐ Outline 4-6 clear steps
- ☐ Describe what happens at each step
- ☐ Link from About page

05

Create Dedicated Service Pages

WHAT: One page per service you offer, each with full detail — not just a paragraph.

HOW: For each service, write: what it is, what's included, what the process looks like, who it's for, common problems it solves, and results customers see. 400-600 words minimum per page. Add links to related sub-services.

■ **PRO TIP:** Treat each service page like its own mini-website. AI may land directly on it.

- ☐ List all services you offer
- ☐ Create one page per service
- ☐ Write 400+ words per page
- ☐ Link to sub-service pages where relevant
- ☐ Add photos/before-after images

06

Build Use Case / Demographic Pages

WHAT: Pages targeting specific customer types or situations — makes AI match you to more prospects.

HOW: Format: '[Your Service] for [Customer Type or Situation]'. Examples: 'Roofing for New Homeowners', 'HVAC for Rental Property Managers', 'Plumbing for Restaurant Owners'. One page or blog post per use case.

- ☐ Brainstorm 5-10 customer types or situations you serve
- ☐ Create a page or blog post for each
- ☐ Use 'X for Y' in the title and H1

07

Publish Case Studies

WHAT: Real project stories that prove your results — AI loves these to match to similar prospects.

HOW: Format for each: Customer situation → Problem → What you did → Result. Be specific: 'We replaced a 22-year-old roof in Marietta, GA in one day. Homeowner passed insurance inspection 3 days later.' Aim for 5+ case studies.

■ **PRO TIP:** Case studies are the #1 thing AI uses to match your business to a prospect's specific problem.

- ☐ Identify 5-10 memorable past jobs
- ☐ Write up each as: Situation → Solution → Result
- ☐ Include location, scope, and outcome with numbers
- ☐ Add before/after photos if possible

08

Build a Reviews / Social Proof Page

WHAT: A dedicated page showcasing your best reviews and summarizing common praise themes.

HOW: Pull your best Google/Yelp reviews. Group them by theme: 'Customers consistently mention speed, professionalism, and cleanup.' Add a section for each theme with supporting quotes.

- ☐ Collect top 10-20 reviews
- ☐ Identify 3-5 common themes
- ☐ Create /reviews or /testimonials page
- ☐ Embed or quote reviews with customer name + city
- ☐ Add Review schema markup

09

Write Competitor Comparison Pages

WHAT: Pages that explain why a prospect should choose you over specific competitors.

HOW: For your top 3-5 competitors, create a page titled '[Your Company] vs [Competitor]'. Explain your differentiators honestly. Who is each option best for? Be factual, not negative.

■ **PRO TIP:** AI reads these pages when a prospect asks 'who's better — Company A or Company B?'

- ☐ List your top 3-5 local competitors
- ☐ Create one comparison page per competitor
- ☐ Cover: pricing, process, quality, speed, guarantees
- ☐ Be honest about who each option suits best

10

Publish Bottom-of-Funnel Blog Posts

WHAT: SEO content that captures people (and AI) researching their decision right now.

HOW: Write posts targeting: 'How to choose the best [service] company in [city]', 'What to look for in a [service] contractor', 'Questions to ask before hiring a [service] company'. These rank in search AND get cited by AI.

- ☐ Write 'How to choose best [service] in [city]' post
- ☐ Write 'Questions to ask before hiring a [service]' post
- ☐ Write 'How to fix [problem your service solves]' post
- ☐ Aim for 800-1200 words per post
- ☐ Link to your service pages from each post

SITE STRUCTURE REFERENCE (for AI / Antigravity)

When building or updating pages, follow this hierarchy. Each parent page links to its children. This makes it easy for AI crawlers to discover all content from any entry point.

URL Pattern	Page Name	Links To
/about	About (main hub)	/about/history, /about/why-us, /team/[name], /how-it-works
/faq	FAQ	Service pages, pricing, contact
/pricing	Pricing	Contact / quote form
/how-it-works	How To Work With Us	/about, /contact
/services/[service]	Service Page	/services/[service]/[sub-service], /case-studies, /reviews
/for/[use-case]	Use Case Page	Relevant service page, /contact
/case-studies/[slug]	Case Study	Related service page
/reviews	Reviews / Social Proof	/contact, /services
/vs/[competitor]	Competitor Comparison	/contact, /about
/blog/[slug]	Blog Post	Relevant service page, /contact

PAGE CONTENT BRIEF (copy-paste for each page)

Page URL	/services/roofing (example)
Page Title (H1)	Roofing Services in [City] [Company Name]
Meta Description	150-160 chars. Include service + city + main benefit.
Word Count Target	400-800 words for service pages. 800-1500 for blog posts.
Must Include	What is this service Who needs it What's included Process Results/outcomes CTA
Internal Links	List 2-4 pages this page should link to
Schema Markup	Service, FAQPage, Review, LocalBusiness — whichever applies
Images	At least 1 relevant photo with descriptive alt text
CTA	Phone number, quote form, or 'Get a Free Estimate' button

■ NOTE FOR AI / ANTIGRAVITY

When reading this document to build or audit a website, treat each checked item in the Master Checklist as a required deliverable. For each page, follow the Content Brief template above. Use the Site Structure Reference to set correct URL patterns and internal links. Prioritize pages in the order listed (Step 01 first, Step 10 last). If a page already exists, audit it against the Step requirements and fill any gaps.
