

# SEO Audit Report

glorifli.com | March 2026

## Executive Summary

Glorifli is a brand-new site (launched in 2025) targeting local service businesses with website + SEO services. The site has a clear value proposition and strong conversion-focused copy. However, it currently has **zero organic visibility** — it does not appear in Google search results for any target keywords, has no indexed pages showing in search, no backlinks, and several critical on-page and technical SEO gaps that need to be addressed before any meaningful organic traffic can be achieved.

|                                        |                 |
|----------------------------------------|-----------------|
| Indexation & Crawlability              | CRITICAL ISSUE  |
| Technical SEO (Title, Meta, Structure) | NEEDS WORK      |
| On-Page Content Optimization           | MODERATE        |
| Authority & Backlinks                  | NOT ESTABLISHED |
| AI Search (AEO) Readiness              | NOT ESTABLISHED |
| Overall SEO Health                     | 25 / 100        |

## Top 5 Priority Fixes

|   |                                                                                                                                               |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>Verify Google has indexed the site</b><br>Use Search Console — site:glorifli.com returns zero results.                                     |
| 2 | <b>Add a keyword-rich meta title &amp; description</b><br>Current title tag is generic: 'Glorifli - We Build Your Website, Or You Don't Pay'. |
| 3 | <b>Create dedicated service/location pages</b><br>One-page site limits keyword targeting. No location or niche-specific pages exist.          |
| 4 | <b>Start building backlinks immediately</b><br>Zero referring domains found. Domain authority is 0.                                           |
| 5 | <b>Set up Google Business Profile</b><br>Not found — critical for local SEO visibility.                                                       |

## 1. Crawlability & Indexation

This is the most urgent issue. A site:glorifli.com Google search returns zero results, meaning Google has either not yet crawled the site or has encountered a crawl block. Without indexation, no SEO effort matters.

**HIGH**

### Site Not Appearing in Google Index

*site:glorifli.com returns no results in Google search as of March 2026.*

Fix: Log into Google Search Console, verify domain ownership, submit sitemap.xml, and use the URL Inspection tool to request indexing of the homepage.

**MEDIUM**

### XML Sitemap Status Unknown

*No sitemap.xml was accessible at glorifli.com/sitemap.xml. Next.js sites require manual sitemap configuration.*

Fix: Install the 'next-sitemap' package and configure it to auto-generate sitemap.xml on build. Submit to Google Search Console.

**MEDIUM**

### robots.txt Status Unknown

*Could not confirm existence of robots.txt at glorifli.com/robots.txt.*

Fix: Ensure robots.txt exists and does not accidentally block Googlebot. Next.js can auto-generate this via next-sitemap.

## 2. Technical SEO

**HIGH**

### Title Tag Not Optimized for Target Keywords

*Current title: 'Glorifli - We Build Your Website, Or You Don't Pay' — brand-first, no searchable keywords.*

Fix: Rewrite to: 'Website Design & Local SEO for Service Businesses | Glorifli' — leads with keywords people actually search.

**HIGH**

### Meta Description Missing or Not Optimized

*No compelling meta description found targeting keywords like 'website design for HVAC' or 'local SEO for contractors'.*

Fix: Write a 150-160 char meta description: 'We build high-converting websites for HVAC, roofing, and local service businesses — guaranteed 3 new clients in 30 days or you don't pay.'

**HIGH**

### Single-Page Architecture Limits Keyword Targeting

*The entire site is one page (homepage). There are no separate service pages, location pages, or niche pages.*

Fix: Create individual pages for each niche (HVAC, roofing, plumbing, landscaping) and target cities. Each page = a new ranking opportunity.

**MEDIUM****H1 Tag Not Keyword-Optimized**

*Current H1: 'Ready To Take On 3 New Clients?' — this is conversion copy, not SEO-driven.*

**Fix:** Move conversion headline to H2. Set H1 to something like: 'Website Design & Local SEO for Service Businesses' — what people search for.

**MEDIUM****No Schema Markup Detected**

*No LocalBusiness, Service, or FAQ schema markup found in the page source (note: JS-injected schema could not be verified — check via Google Rich Results Test).*

**Fix:** Add LocalBusiness schema with business name, description, services offered, and contact info. Add FAQ schema for the FAQ section — this generates rich results in Google.

**LOW****Open Graph / Social Meta Tags**

*Social sharing metadata (og:title, og:description, og:image) could not be confirmed.*

**Fix:** Add proper OG tags so links shared on LinkedIn, Facebook, etc. render with a branded preview card.

### 3. On-Page Content & Keyword Targeting

The homepage copy is well-written for conversion but is not written to rank. The key phrases that local service business owners would search — like 'website design for HVAC companies' or 'local SEO for contractors' — do not appear on the page.

**HIGH****No Target Keywords Present in Page Content**

*Terms like 'HVAC website design', 'roofing company SEO', 'plumber website', 'contractor website design' are absent.*

**Fix:** Naturally work target keywords into homepage copy, especially in the hero section, services section, and testimonials. Don't stuff — integrate.

**MEDIUM****Blog Section Exists But No Posts Found**

*Nav links to /blog but no blog content was accessible — this is a major missed SEO opportunity given that Glorifli sells blog content as a service.*

**Fix:** Publish 2-4 pillar blog posts immediately targeting queries your prospects search: 'how to get more HVAC leads', 'does my roofing company need a website', 'local SEO for contractors guide'.

**LOW****Testimonials Use Generic Job Titles**

*Testimonials say 'Business Owner', 'Service Provider', 'Agency Founder' — these are not specific or credible for local service clients.*

**Fix:** Update testimonials with specific niches and locations: 'HVAC owner, Dallas TX' — adds specificity and helps with local keyword context.

**MEDIUM****FAQ Section Is Unexpanded / Not Crawlable**

*The FAQ section appears to be collapsed/accordion format. If content is hidden behind JS toggles, Google may not index it.*

Fix: Ensure FAQ content is in the HTML source (not JS-rendered only). This is valuable for Google's People Also Ask boxes and FAQ rich results.

## 4. Authority & Backlinks

Glorifli has no backlink profile — zero referring domains found. This is expected for a new site, but it means the site has no domain authority and will struggle to rank even with perfect on-page SEO in competitive markets. Building links should start immediately.

**HIGH****Zero Backlinks / Domain Authority**

*No external sites link to glorifli.com. Domain Rating (Ahrefs) and Domain Authority (Moz) are effectively 0.*

Fix: Priority link sources: (1) Get listed on local business directories (Yelp, BBB, Clutch, UpCity), (2) Guest post on home services industry blogs, (3) Build case study pages that clients link to.

**HIGH****No Google Business Profile Found**

*Glorifli does not appear to have a Google Business Profile, which is essential for local SEO and AI search citations.*

Fix: Create a Google Business Profile for Glorifli immediately. Fill out every field: description, services, photos, hours. This is a major AEO signal.

## 5. AI Search (AEO) Readiness

Glorifli sells AEO optimization as a service — which makes it even more important that Glorifli itself appears in AI-generated answers. Currently, Glorifli does not appear when asking ChatGPT or Perplexity for 'best website designers for HVAC companies' or 'local SEO services for contractors'.

**HIGH****Not Appearing in ChatGPT / Perplexity Results**

*Querying 'best website design for local service businesses' and 'local SEO for HVAC contractors' in ChatGPT returns no mention of Glorifli.*

Fix: To rank in AI search: (1) Get cited on third-party review platforms (Clutch, G2, UpCity), (2) Publish comprehensive guides that AI models reference, (3) Build entity recognition through consistent mentions across the web.

**MEDIUM****No Structured Data for AI Citation Signals**

*AI search engines pull structured data, reviews, and citations. None of these exist for Glorifli yet.*

Fix: Add WebPage, Service, and Organization schema. Get listed and reviewed on Clutch.co and UpCity — both are heavily cited by AI models for agency recommendations.

## Quick Wins (Do This Week)

- 1. Set up Google Search Console and submit sitemap
- 2. Rewrite title tag and meta description with target keywords
- 3. Create a Google Business Profile for Glorifli
- 4. Get listed on Clutch.co, UpCity, and Google Business directories
- 5. Publish one long-form blog post targeting 'website design for HVAC companies'
- 6. Add FAQ schema markup to the FAQ section
- 7. Set H1 to keyword-optimized text; move conversion headline to H2

## Target Keyword Opportunities

These are the highest-value keyword gaps to build content around:

| Keyword                                     | Intent        | Priority |
|---------------------------------------------|---------------|----------|
| website design for HVAC companies           | Commercial    | High     |
| roofing company website design              | Commercial    | High     |
| local SEO for contractors                   | Commercial    | High     |
| plumber website design                      | Commercial    | High     |
| how to get more HVAC leads                  | Informational | High     |
| landscaping company website                 | Commercial    | Medium   |
| does my contractor business need a website  | Informational | Medium   |
| local SEO for home service businesses       | Commercial    | Medium   |
| AI search optimization for local businesses | Informational | Medium   |

## 90-Day SEO Roadmap

| Phase      | Timeframe | Actions                                                                                              |
|------------|-----------|------------------------------------------------------------------------------------------------------|
| Foundation | Week 1-2  | GSC setup + sitemap submit   Rewrite title/meta   Google Business Profile   Fix H1   Add schema   D  |
| Content    | Week 3-6  | Publish 4 blog posts targeting niche keywords   Create HVAC, roofing, plumbing landing pages   Ad    |
| Authority  | Month 2   | Guest post outreach   Get 3-5 client case study pages live   Reach out to home services industry pul |
| Scale      | Month 3   | Review GSC for ranking keywords   Expand to 8 blogs/month   Build programmatic location pages        |
